University Library.

Babu Joykissen Mookerjee, of Ooterpara, made a donation of Rs. 5,000 to the University, on the 20th July, 1869, for the purpose of forming a Library. The amount was invested in four per cent. securities till the completion of the University building.

In 1874, the sum of Rs. 3,500 was added to the Library Fund from the surplus income of the University of that year; and the Syndicate, having thus at their disposal more than Rs. 9,000 appointed a Committee to report on the steps it was advisable to take to form a Library. The Committee reported (see Minutes, Vol. XVIII, page 22) that they thought "it desirable to begin with procuring such books as shall render the Calcutta University Library *Supplementary to other Libraries now existing in Calcutta.*" The general principles laid down by the Committee, and the mode of procedure they proposed for adoption, were approved by the Syndicate; and further transfers have from year to year, been made to the Library fund from the surplus income of the University. Several instalments of books have been received, and the Library now contains, besides English works of reference, and the chief authorities on Indian antiquities, fairly complete sets of the Sanskrit, Arabic, Latin, French and German classics. The following Regulations have been approved by the Syndicate:—

Regulations for the Management of the University Library.

1. (*a.*) The Library shall be under the management of a Committee consisting of not less than five Resident Fellows of the University, who shall be appointed annually by the Syndicate. The Registrar shall be *ex-officio* Librarian and Secretary of the Committee.

Appointment of the Committee.

(*b.*) Members of the Committee, who may leave India during their year of office, with the intention of not returning before the end of their time of office, shall be considered to have vacated their membership.

(*c.*) Vacancies which may be caused by the retirement or departure of Members, or otherwise, at any time during their year of office, shall be reported to the Syndicate, who may then, at their discretion, nominate other Fellows to the office vacated.

(*d.*) The Syndicate may at any time, at their discretion, appoint additional Members to the Committee.

Powers and duties of Committee.

2. (*a.*) It shall be competent to the Committee to make such bye-law, rules and arrangements, as they may think fit, for holding meetings, and generally for conducting the business pertaining to their office, provided that all such rules and arrangements are consistent with the provisions of the Act of Incorporation, the Bye-laws of the University, and with these present Regulations.

(*b.*) The Committee shall decide on the purchase of books with the moneys placed at their disposal for that purpose by the Syndicate.

(*c.*) The Committee shall establish a regular and authentic record of all books borrowed from the Library and returned to it, together with the name of borrowers, the dates of borrowing and returning and such further details as they may deem advisable.

Privileges of Fellows.

3. The Library is for the use of Resident Fellows of the University, and they alone have the privilege to use it, subject to the present Regulations and to such further rules and orders as may be agreed to by the Library Committee under Regulations 2 (*a*).

Admission of Non-Fellows.

4. (*a.*) Persons residing in Calcutta, not being Fellows of the University, may receive special permission from the Syndicate to use the Library for the purpose of literary research Such permission will be granted only on the recommendation of the Library Committee.

(*b.*) In recommending any person to the Syndicate under this Regulation, the Library Committee shall specify in writing, for the information of the Syndicate, the grounds on which they base their recommendation.

(*c.*) Persons not being Fellows of the University may consult the Library for the purpose of literary research, without removing the books from the Library, between the hours of half-past ten A. M. and half-past three P. M. on the written recommendation of a Member of the Library Committee to the Librarian, but not otherwise.

Conditions of borrowing and returning books.

5. (*a.*) Subject to the exceptions specified in Regulation 7, Fellows and other persons allowed to use the Library under Regulation 4 (*a*) may borrow and temporarily remove such books as they may require, provided that one person shall not at one and the same time have more than ten volumes in his possession on loan from the Library. In this Regulation the term "volumes" shall include pamphlets and parts of works separately sewn.

(*b.*) No books shall be issued and delivered except to the authorised borrower in person, or to some one having written authority from him to receive it on behalf of the authorised borrower.

(*c.*) Every volume borrowed shall be returned to the Library within two calendar months of the date on which it was removed from the Library. In case any borrower fails to return any book within this period, a notice shall be sent to him by the Librarian calling for the return of the book.

(*d.*) If a book called for under the previous section be not returned within one week after the receipt of the Librarian's notice, the person who has borrowed the book from the Library shall be subject to a fine of one rupee for each volume so retained, and to a further fine of an equal amount for each additional week that he may retain it after the expiration of the second week.

SARADA PRASAD SCHOLARSHIP AND PRIZES.

The late Babu Sarada Prasad Roy, Zemindar of Chakdighi, bequeathed by his will to the University a sum of Rs. 5,000 which it was left to the Syndicate to utilise in the best way they thought fit. In February, 1885, the University received from Babu Lalit Mohan Roy, the heir of the deceased, a Government Promissory Note for Rs. 5,000, and in April, 1888, the Commissioner of Burdwan forwarded the interest on the same amounting to Rs. 3,500. The capital at the disposal of the University thus stood at Rs. 8,500. After consultation with Babu Lalit Mohan Roy, it was determined to found a scholarship of the value of Rs. 10 a month, to be called the Sarada Prasad Scholarship, to be awarded annually to that one of the successful candidates for the First Examination in Arts who having passed the Entrance Examination from the Chakdighi Higher Class English School, had prosecuted his studies in an affiliated College for a period of two years; and in case no successful student appeared from that School, to that one among the successful candidates for the F. A. who had passed the Entrance Examination with the greatest credit from the Burdwan District.

It was also determined to apply the balance which remained, amounting to Rs. 100 every year, to the foundation of four prizes of books, to be called the Sarada Prasad Prizes, to be awarded to the four successful candidates who stood highest in the subjects of Physics, Chemistry, Logic and History respectively. As no separate examination in Chemistry is to be held until 1891, it was decided that two prizes should be given, up to that year, to the two highest candidates in the subject of Physics.

Hughli College.

AFFILIATED, 1857.

This Institution was founded in 1836, and was originally supported from funds bequeathed by Muhammad Mohsin, a wealthy Muhammadan gentleman, who dying without heirs in the year 1806, left his large property, yielding an annual income of Rs. 45,000 to Muhammadan Trustees "for the service of God." Owing to the misappropriation of the funds, Government assumed the office of Trusteeship. The right of assumption was opposed by the original Trustees, but upheld both by the Courts in India and by the Privy Council in England. The period of litigation extended over many years, during which the annual income accumulated, forming a surplus of Rs. 8,61,100. The surplus was devoted to the foundation and endowment of the Hooghly College, and was further increased by a portion of the original zemindaree that became available on the death of one of the Mootawallees of the Hooghly Imambarah, an Institution which also derives its support from Muhammad Mohsin's legacy. The College endowment was further increased by the accumulation of unexpended revenue, until the income amounted to Rs. 51,000 per annum. In 1873, the Government of India resolved to transfer the whole of the Mohsin endowment to the purpose of Muhammadan education throughout Bengal, and accordingly increased the provincial assignment for education in Bengal by Rs. 50,000 a year, in order to meet the expenses of the Hooghly College, which has now become an Institution maintained by the Government.

The College consists of three Departments, an English, an Arabic, and a Law Department, and is under the control of the Director of Public Instruction, Lower Bengal. The English Department is open to all students who have passed the University Entrance Examination, the fees being one rupee per mensem for Muhammadans, and Rs. 6 for all others. Krishnagar College.

AFFILIATED, 1857.

This College was founded by Government in 1845, and is under the control of the Director of Public Instruction, Lower Bengal.

Any person who has passed the University Entrance Examination may be admitted. Students pay a monthly fee of Rs. 5.

The College is a handsome building, standing upon 3 bigahs of land, and surrounded by an enclosed compound of upwards of 100 more. It was erected in 1856 at a cost of Rs. 66,876; 17,000 of which was collected by private subscription. In consideration of the liberality thus manifested in the district, a donor of Rs. 1,000 is allowed to place a boy, free of expense, at the College in perpetuity, and another, for every Rs. 500 additional he may have subscribed. Part of the ground occupied was purchased by Government; for the remainder, the College is indebted to the munificence of the Maharaja of Nuddea and the Maharani Swarnamyi, of Cossimbazar.

In 1871, the B. A. classes (the third and fourth year classes) were abolished by Sir George Campbell, then Lieutenant-Governor of Bengal; and for some years the College only afforded instruction up to the First Examination in Arts. In 1875, however, Sir Richard Temple, on the petition of the chief inhabitants of the district, consented to restore the College to its former status, provided that a considerable share of the increased cost was subscribed for by the community. A sum, amounting to more than Rs. 40,000, was subscribed during the year, and with this endowment the College was re-established on its original footing. Classes for the A. Course for the B. A. were opened in June, 1888.

A prize of Rs. 80 founded by Babu Mohini Mohan Ray in 1883, and called the Mohini Mohan Ray prize, is awarded annually to the student who most successfully passes the B. A. Examination with honours, or to a graduate of the College who passes the M. A. Examination in any subject.

Berhampur College.

AFFILIATED, 1857.

It was opened as a College in 1853.

It was raised to the status of a College, giving instruction up to the standard of the B.A. Examination of the University of Calcutta in 1865.

Law Department was added in 1864. The status was, however, reduced in 1872, and instruction is now given up to the First Arts Examination of the University of Calcutta. The Law Department was abolished in 1875. It is open to all classes of the community, and any University undergraduate is admissible.

The foundation-stone of the building, one moiety of the cost of which was paid by the community, was laid in 1863, and it was occupied in 1869.

Attached to the College is a Hindoo Hostel, the boarder's fee for which is Rs. 4 a month. Rai Rajiblochan Roy Bahadur, the generous Dewan of Her Highness the Maharani Swarnamayi of Kasimbazar, died in 1881 leaving the sum of Rs. 15,000 to the Berhampore College, the interest to be used for assisting deserving students.

The interest of this sum in used in giving five scholarships of Rs. 5 a month each, to the five students who gain the highest marks among the candidates, who compete for the Entrance Examination *from the Berhampore centre*. Each student retains his scholarship for two years, on the condition that he continues for that time in the Berhampore College, after passing the Entrance. Full information about these scholarships will be obtained by referring to the Calcutta Gazette, dated 10th December 1884, Supplement, page 2457.

In pursuance of the policy recommended by the Education Commission and adopted by the Government of India, the Bengal Government decided in 1886 to transfer the Berhampore College to private management. The munificent offer of Her Highness the Maharani Swarnamayi, C. I. of Cossimbazar to maintain the College for five years, was accepted.

Accordingly, by Bengal Government Resolution dated the 14th May 1887, the control of the College, administrative and financial was vested in a Board of Trustees, nominated by the Maharani, consisting of the District Magistrate and the District Judge for the time being Babu Baikunthanath Sen, B. Doveton College.

AFFILIATED, 1857.

This College is attached to the Parental Academic Institution, a day and boarding-school which was established on the 1st March, 1823, by a body of Christian parents who were anxious to secure for their children the benefits of liberal education, its affairs being conducted by a Committee of Management elected chiefly from among the parents.

In 1855 a legacy of rupees Two Lakhs and Thirty Thousand was bequeathed to the Institution by the late Captain John Doveton, which enabled the Committee of Management to extend its sphere of usefulness by the addition, in 1856, of an Infant School or Initiatory

Department, and the establishment of a College Department, named in honour of the donor. A few years later a Girls' Department was added.

In 1871 other bequests were made to the Institution by the late Mr. Lawrence Augustus de Souza, of the Firm of Messrs. Thomas de Souza and Sons of Calcutta. These consist, first, of the interest on a sum of rupees Three Lakhs, made permanently applicable to the maintenance and education of a certain number of boys and girls of East Indian parents of a certain class, who are admitted as boarders on the "Lawrence de Souza Foundation," at the age of 10, and kept at school till the age of 18; and second of the interest on a sum of Rs. 15,000 for the establishment of a Scholarship in English literature, styled the "Lawrence de Souza Scholarship." It is of the value of Rs. 50 per mensem, and is tenable for one year at the Doveton College; but it is open to any East Indian boy from any School or College, the successful candidate of one year being at liberty to compete for and hold the Scholarship from year to year until he graduates.

In addition to the above, Mr. L. A. de Souza bequeathed a further sum of Rs. 30,000, the interest of which is to be applied towards the education in England of an East Indian youth of ability, with the view of enabling him to compete for the Covenanted Civil Service of India. This is open to any East Indian candidate, whether educated at the Doveton College or elsewhere.

AFFILIATED, 1857.

This School was founded in 1845, and was formerly located in Chowringhee, Calcutta. In 1863 the want of a good school in the hills was much felt, and Calcutta being well supplied with schools, the old premises were sold, and with the proceeds an estate was purchased in Darjeeling, and a new school bearing the same name as the school in Calcutta was built.

In 1858, two scholarships, worth 20 rupees a month, were founded as a memorial of Bishop Wilson, who had been from the beginning a warm friend to the school. One is given every year, and held for two years.

In 1863, Mr. Patrick Arson of Calcutta bequeathed to the school Rs. 3,500—Government securities 5 per cent.—to establish an "Arson Scholarship."

Serampore College.

AFFILIATED, 1857.

This Institution was founded in 1818 under the patronage of the Marquis of Hastings, then Governor-General of India, by the Revs. Dr. Carey, Dr. Marshman, and W. Ward, who, together with Colonel Krefting, the Danish Governor of Serampore, and J. C. Marshman, Esq., formed the First Council.

In 1821 it received a munificent donation from the King of Denmark consisting of certain premises to the north-west of the College, and this act of liberality was followed in 1828 by the grant of a Royal Charter giving perpetuity to the Institution and its endowments. At the cession of Serampore to the East India Company, this Charter was confirmed at the especial request of the Danish Sovereign.

The ground on which the College stands was purchased chiefly by subscription; the entire expense of the buildings, amounting to about £15,000, was met out of the private funds of the Serampore Missionaries who were the first promoters of the undertaking. After the death of Dr. Marshman, the funds for carrying on the operations of the College were provided partly by the endowments, but chiefly by the liberality of J. C. Marshman, Esq., the only surviving member of the original Council. On his departure from India in 1856 the College was placed under the general direction of the Baptist Missionary Society, which has since contributed towards its support and become identified with its operations.

XXVI.

The General Assembly's Institution, Calcutta.

AFFILIATED, 1864.

This Institution was established in 1830, by the General Assembly of the Church of Scotland. It is the oldest Institution of the kind in India: for it was here that the system, now all but universally followed, was first tried—of imparting the highest forms of knowledge, including sound Christian instruction, through the medium of the English language. Before this experiment, Bengali, or Sanskrit had been exclusively favoured in Bengal by the Government, by Oriental Scholars, and even by Missionaries themselves. The new system was introduced by Dr. Duff, who began his Missionary labours by founding this Institution. Valuable help in the way of

procuring pupils was given at the commencement by the famous Rajah Ram Mohan Roy. The success of the Institution soon surpassed all expectations. The Governor-General declared publicly that it had produced "unparalleled results." After having been carried on for some years in various hired premises, the Institution was removed in 1839 to the present building, which is most conveniently situated in Cornwallis Square, in the very centre of the Hindu population.

The Institution was temporarily closed in 1844, in consequence of the secession of the Missionaries with the Free Church. But it was re-opened in 1846 by the Church of Scotland, under the superintendence of the late Rev. Dr. Ogilvie, by whom it was carried on uninterruptedly, and with great efficiency, till his death in 1871. Dr. Ogilvie was succeeded by Dr. Robert Jardine who retired in 1876; after which Mr. James Wilson officiated as Principal for the next two years.

The General Assembly's Institution is divided into two departments,—the College Department and the School Department.

The College Department, which has been affiliated in the Faculty of Arts to the University of Calcutta since 1864, was attended in 1883 by more than 400 students, divided into five classes, and paying a monthly fee of Rs. 5 each. In these classes the regular subjects of the University curriculum are taught, embracing the English language and literature, the Sanskrit language and literature, history, mathematics, pure and applied, chemistry, physics, botany and physiology, mental philosophy, and the doctrines and evidences of the Christian religion.

The School Department was attended in 1883 by 690 pupils, divided into fourteen classes, and paying fees in the different classes from 8 annas to Rs. 2-8 a month. Instruction is given in these classes in English, Bengali, and Sanskrit, history and geography, arithmetic, algebra, and geometry, according to the degree of advancement which they have attained. Careful attention is also given to instruction in religious knowledge.

The Government grant to the General Assembly's College has been raised since 1881 from Rs. 350 to Rs. 600 a month in consequence of the large increase in the number of students.

Scholarships and Prizes.

1. The Macfarlane Gold Medal is awarded every year to the student of the fourth-year class who shows the greatest proficiency in all the College examinations of the year.

2. The Ogilvie Memorial Scholarship, of at least Rs. 5 per mensem, is awarded every alternate year to the student of the second-year class who takes the highest position in all the College examinations, and succeeds in passing the F. A. Examination of the University. This Scholarship is tenable in the General Assembly's College for the two years after passing the First Examination in Arts.

3. The Macleod Memorial Scholarship is awarded to a Christian student, who being an under-graduate of the Calcutta University, is preparing for the ministry of the Christian Church.

4. The Steel Gold Medal is given for Scripture knowledge.

5. Several prizes and scholarships are awarded for general proficiency in the College examinations.

Bishop Cotton School, Simla.

(FOUNDED, 1859: AFFILIATED, 1866.)

This School, the Head Mastership of which is in the appointment of the Bishop of Calcutta, was founded by the Most Rev. G. E. L.

Cotton, Bishop of Calcutta, under the name of the Simla Public School. The Founder promulgated statutes for the School in 1863, wherein he styled his foundation, the Bishop's School, Simla; but this designation was subsequently changed, in 1866, to that at present in use for the purpose of perpetuating the name and generosity of the Founder.

The Government of the School is vested in a body of eight Governors, who act in conjunction with the Head Master.

The Governors are four *ex-officio*, and four elected from permanent residents of Simla.

The Head Master must be a communicant, and, *ceteris paribus*, one in Holy Orders is to be preferred to a Layman; the second and Assistant Masters and all subordinate officers are appointed by the Head Master, their number being fixed by the Governors.

There are eight exhibitions of the annual value of Rs. 120 which are awarded to boys, whose parents cannot without difficulty pay the full charges for their education.

A limited number of other exhibitions has also occasionally been awarded either under the same conditions as above, or as prizes given by examination: one such is being held at the present time.

The Trustees have the right of accepting any exhibitions founded by private liberality, under any rules, or on any patronage of which they approve.

The course of instruction in the Primary and Middle Departments of the School is framed upon the Educational Code of the Panjab Government: the High School adopts for its standard the curriculum of this University. Latin and Urdu are taught throughout the School: French, Greek, Drawing, Music, and Carpentering are taught as optional subjects. All the scholars are required to attend daily prayers, and to receive regular instruction in Holy Scripture. There is also instruction at stated times in the Church Catechism and the Prayer Book. The Institution is open to all classes, and its object, as declared by the rules, is to impart instruction in the English language and literature, in mathematics and science, in law, in the oriental classical languages, and the vernacular languages of the Province of Oudh. Its management is vested in a Committee, consisting of the Commissioner of Lucknow, the Deputy Commissioner, the Inspector of Schools, Oudh Circle, the District Judge, the Executive Engineer, the Principal, and the representatives of the Talookdars.

The students of the Entrance and Preparatory Entrance classes pay a fee of two rupees per mensem. The fee for the College classes is Rs. 3 for the F. A. classes, and Rs. 5 for the B. London Mission College, Benares.

AFFILIATED, 1871.

This College is the result of the gradual growth of a small vernacular school formed in the Sikraul suburb of Benares, by the Rev. M. T. Adam in 1821, the year after the Benares Mission of the London Missionary Society was established by him. In 1823 this School was succeeded by another founded by him in the Kashipur portion of Benares. Such Schools gradually multiplied until in 1840 they were eight in number and contained 405 pupils. Early in 1844 a superior Education Establishment was opened under the name of the Central School in the heart of the city; and in November 1845 its standard was raised by the addition of an English Department. During the next twenty-five years it gradually absorbed into itself the smaller schools; and its educational character steadily advanced until it reached the Entrance standard of the Calcutta University. In 1870 it was removed to a suburb of the city and united with another school which had rapidly sprung up there. In the following year this amalgamated institution was affiliated under the name of the London Mission High School up to the First Arts standard of the Calcutta University. During the succeeding twelve years its progress continued; and early in 1883 it was affiliated under the name of the London Mission College up to the B. A. standard of the Calcutta University.

The number of students on the rolls is about four hundred and fifty. Instruction is given in Christianity and in general secular subjects from the Alphabet in English and in the vernaculars up to the B. A. standard.

The late Maharaja of Vizianagram, K.C.S.I., endowed the institution with a sum of money for the annual purchase of a gold medal of the value of eight pounds, to be called the "Vizianagram medal," to which is attached a small monthly scholarship. In addition, the College awards several scholarships to deserving students, tenable for twelve months.

Monthly returns as to the attendance, progress and conduct of the pupils are sent to their guardians whose suggestions and co-operation are also invited

16.

Burdwan Raj College.

AFFILIATED, 1882.

This Institution, since its first establishment in 1817, has been one of slow but steady growth. True to its mission of supplying the demands of the public of Burdwan for education, in the modern acceptation of the term, it has always kept pace with the real wants of the place. Started as an Anglo-vernacular school, imparting rudimentary education which satisfied the intellectual craving of the Burdwan people of the early days of British rule in India, it passed through different stages of improvement, developed various phases of usefulness, and at last attained a recognized position as a second grade College in 1881.

The responsibility of teaching a zila, worthy as it was of the princely and munificent house that undertook it, assumed at a later period such formidable proportions as might well stagger any man of weaker nerves than those of His Highness the lamented Maharaja Mahtab Chand Bahadur. When the Government, actuated by a sense

of the growing wants of the people of Burdwan, and dissatisfied with the slow and indifferent working of the moribund Government school that dragged its listless existence from year's end to year's end, intended to enlarge the sphere of its usefulness, the Maharaja, jealous for the honour of his house, which could never brook a rival in its field of charity, undertook so to improve the condition of his own school, that by providing for all the educational wants of the district, it would supersede the necessity of a second institution maintained by the Government. A great change accordingly came over the spirit of the Institution. His Highness the Maharaja, with characteristic liberality and discrimination, rose equal to the magnitude and urgency of the occasion and thoroughly reorganized and improved the Institution by establishing it on a sounder basis. It was then that the school in all its departments was enabled for the first time, to meet the varied requirements of a community that after ages of intellectual torpor was at last awaking to a sense of its degradation and wants. The College, as the Institution then first came to be called, was so organized as to consist of four Departments—English, Persian, Bengali, and Sanskrit. Thus it will be seen that the arrangements which, by reason of their variety, were calculated to meet the wants of the different sections of the community, left no room for complaint. Later on the rapidly growing demand for better education and higher culture which characterized the movements of the people in and about the metropolis, and which ere long made its way even into the backward district of Burdwan, did not find the Maharaja unprepared. He anticipated the demands of the people and commenced a magnificent building for the future accommodation of his school, which he intended to elevate to the condition of College. This building and the good work in connection with it were destined, however, to be completed by his worthy successor, and the College was in 1881 affiliated to the Calcutta University up to the Standard of the First Examination in Arts, and was located in the same year in the block of buildings that it now occupies.

The educational establishments of His Highness the Maharaja divide themselves at the present time under six heads :—First the College Department, which is open to all students that are matriculated in the Calcutta University, teaching up to the F. A. standard.

Second, the School Department serving chiefly as a feeder or tributary to the above, preparing students for the Calcutta University Entrance Examination.

Third, the Bengali School, teaching up to the Vernacular Scholarship Examination standard.

Fourth, the Persian Department, teaching, amongst others, those boys of the first two Departments that take up Persian as their second language.

Fifth, the Sanskrit School, imparting instruction in the orthodox native style to those whose religious scruples prevent them from availing themselves of the advantages of the English school.

And sixth and last, the Girls' Schools, the present provision in connection with which, though meagre, is more than sufficient to meet the requirements of female education as it is understood in Burdwan. * All these Departments, with the exception of the last two, are under the control of the Principal.

The disbursements in the different Departments aggregate annually about Rs. 21,000, they being entirely met by the munificent charity of His Highness the Maharaja.

Education in all its varieties and phases is imparted gratuitously, several boys in consideration of their extreme indigence being found in money, besides being provided with free tuition.

Three scholarships of Rs. 10 per month each, and tenable for two years, are annually awarded to the best amongst those successful F. A. candidates from the College who fail to secure Government Senior scholarships, to enable them to study for the B. A. Examination.

Uttarpara College.

AFFILIATED, 1887.

This College is the final outcome of the long-continued efforts of Babu Jaykissen Mukherji (lately deceased) in furtherance of the cause of English education. In 1846 he had a Government School opened at Uttarpara, on the basis of an endowment by him and his brother Babu Rajkissen Mukherji (also deceased), of Rs. 1200 a year, and a Government assignment of equal value. The School prospered, and won its way to the front rank among the schools in Bengal.

Babu Jaykissen's wish was that his School should ultimately expand into a College, and to this end so long ago as the year 1853 he asked Government to raise the School to a first class College, offering to contribute an equal sum with Government towards the maintenance of the College. Government did not, however, comply with the proposal. In 1883 he submitted a proposal for the conversion of the School into a second grade College, offering to make an endowment for its support, so that it might cost the Government

nothing. The recently initiated educational policy of Government stood, however, in the way of his proposal being accepted, and it was accordingly not accepted. He finally went up to Government in April 1887 with a proposal for the establishment of an aided College in connection with the old Government School. Government accorded him permission to open such a College, but on the condition that he took the School too off the hands of Government. He agreed to do so, provided Government left the school the material advantages it derived from its connection with Government. The terms of the transfer have now been settled, and it remains only to effect the transfer formally to a Committee consisting of the Magistrate of Hughli as President, and of the Hon'ble Raja Pearymohan Mukerjee, C.S.I. and Babu Rasbihari Mukerjee as Representatives of the late Babu Jaykrishna Mukerjee and of Babu Manohar Mukerjee as representative of the late Babu Rajkrishna Mukerjee.

Armenian College.

AFFILIATED, 1888.

This College is attached to the Armenian Philanthropic Academy, a day and boarding School, which was established on the 2nd of April 1821, by influential members of the Armenian community resident in Calcutta, "for the education of our youth both rich and poor." In 1813 Chatoor Mooratkhan bequeathed a sum of Rs. 8000, towards the opening of such an institution, and his liberality was so supported by a large number of donations, that when the Academy was set on foot it owned over Rs. 200,000.

Until the year 1883 the affairs of the School were administered by a number of Armenian gentlemen, who were styled Members of the Institution, and who elected four of themselves to be Managers. But in that year, under a decree of the High Court of Judicature at Fort William in Bengal, a scheme was drawn up for the future regulation and management of the Academy. The Funds of the School were placed in the hands of the Official Trustee of Bengal, and a board of Managers was appointed.

The College keeps on its rolls about thirty foundationers of Armenian parentage. Some of these lads are provided for by the Armenian Association of Batavia; others, by the Armenian Church of Calcutta, and others, by the College itself. Besides these, pupils of all denominations are received as boarders and day-scholars on payment of the usual fees.

It is designed to supply the Public Works and Survey Departments with Assistant Engineers, Overseers, and Sub-Overseers, and to furnish professional works either on loan or purchase through its Library, Press, and Book Depôt.

The College contains three principal classes, *viz.*, an "Engineer Class," an "Upper Subordinate Class," and "Lower Subordinate Class," open to candidates of all ranks and classes—intended to recruit the Engineer, Upper Subordinate, and Lower Subordinate Departments of the Public Works Department. It also conducts examinations of outsiders for several grades of the P. W. D.

Engineer Class.

The class is open to all statutory natives of India.

The Course lasts two years, when the passed students receive certificates as Assistant Engineers of the P. W. D. A certain number 4 and 5 in alternate years receive permanent appointments to the P. W. D. in the Engineer grade commencing as Apprentice Asstt. Engineers. A year's training as Apprentice is also given to two more, and there are also two permanent appointments to the Upper

Subordinate Grade open. Candidates for this class must be between the ages of 18 and 22, and must all pass a *competitive* entrance examination in language, literature, history, mathematics and elementary drawing and physical science.

All European students pay a college fee of Rs. 10 monthly. Three scholarships of Rs. 50, one of Rs. 40, and one of Rs. 35, per mensem, tenable for two years, are annually open to native students. Several valuable prizes are given annually; one of Rs. 1000 to the best student; one of Rs. 250 and one of Rs. 100 for the two best native students; besides two prizes of Rs. 100 and five of Rs. 50, open to all.

Upper Subordinate Class.

The College Course lasts two years, when the passed students receive certificates as Sub-Engineers or Overseers of the P. W. D., and 25 standing first on the list are then sent for a year's probation on to the Public Works as "Apprentice Overseers," after which, if approved, they are appointed 1st, 2nd, or 3rd grade Overseers in the P. W. D.

All candidates for admission must pass a *competitive* entrance examination in English reading and writing, arithmetic, elementary geometry, mensuration, and drawing, and in Urdu and Hindi; and civilian candidates must be between the ages of 18 and 24.

Soldier students receive a "college allowance" of Rs. 11 monthly. Three scholarships of Rs. 30 each, and three of Rs. 25 each per mensem, are annually allotted to English civil students, and three of Rs. 10 each to native students, all tenable for two years.

Students of third grade, if not stipend-holders, pay a college fee of Rs. 1-8 monthly. College prizes in each of the principal subjects of the course are annually given.

During the "apprentice year," a "staff allowance" is given to soldier students, raising their pay to a total of Rs. 80, together with free quarters and the usual "family allowance." Second and third grade apprentices receive salaries of Rs. 60 and 40 respectively; free quarters are also given to those of the second grade.

Lower Subordinate Class.

This class is intended for natives of India only. Most of the students remain for one and a half years only at College, and if successful, receive certificates as Sub-Overseers, and are appointed to the P. W. D., as vacancies occur: there is no guarantee of appointment.

The Entrance Examination is competitive, and in the Urdu language. It comprises for class A, elementary history and geography, and the use of English figures and words. (1) Civil Engineers.
(2) Foreman Mechanics (Apprentices), or Upper Subordinates.

Pupils for the Engineer Department are admitted on producing a certificate of having passed the University Entrance Examination : their theoretical course, including two and one half hours daily in the shops, is completed in four years, and the fifth or last year is spent at Akra in learning brick-making, and on works in progress.

The tuition fee for this Department is Rs. 8 per mensem during the four years of their instruction in class, no such fee being charged to any student after the completion of his theoretical course. The messing fees for those who reside upon the premises are,—for Christians, Rs. 20 plus Rs. 5 for rent ; for Natives, Rs. 7 plus Re. 1 for rent.

For admittance to the Apprentice Department there is an examination, but any candidate who has passed the University Entrance Examination, or has passed by Standard VII of the code of European schools is admitted without further test. The theoretical course—including three hours daily in the shops—continues for three and a half years, and the remaining year and half of the five years' apprenticeship is spent entirely in the shops learning a trade.

Members of this department *must* be boarders, and the charge for Europeans and Eurasians up to 25 in number is Rs. 5 each per mensem, whilst 5 are admitted free, and for natives up to 40 in number Rs. 2 per mensem ; but apprentices in excess of these numbers are received on payment of the same messing fees as Engineer students.

In the year 1884 there were 13,456 soldiers killed in battle.

No one, as far as I know, had praised Cæsar's friend, that he might himself be praised by Cæsar.

On its being known at Rome that Cæsar had passed the Rubicon, the Senators who favoured Pompey were terrified to such a degree that they suddenly met and declared it necessary that all those citizens who wished the republic to be safe should immediately take up arms. Pompey being asked why he had not an army at such a time replied that he could go with the two legions which had come from Gaul.

L'attrapeur de mouches paraissait souvent à sa grille, et prenait plaisir à suivre du regard le comte, si affairé autour de sa plante. Il l'a vu combiner et préparer son mortier, tresser ses nattes, nouer ses paillassons, édifier enfin ses palissades, et, prisonnier comme lui, et depuis plus longtemps que lui, il s'est facilement uni par la pensée aux grandes préoccupations du philosophe.

A cette même fenêtre grillée, une autre figure, fraîche et souriante, vint aussi se montrer une fois. C'était une femme—une jeune fille, à la démarche tout ensemble alerte et craintive. Dans l'allure de sa tête, dans l'éclair de ses yeux, la modestie seule semblait tempérer la vivacité. Son regard, plein d'âme et d'expression, s'éteignait à moitié en passant au travers de ses longs cils abaissés. Au premier abord, en la voyant, le front incliné dans l'ombre, gardant une attitude rêveuse derrière ces sombres barreaux, sur lesquels s'appuyait en se repliant sa main blanche, on l'eût prise pour un chaste emblème de la captivité.

Mais quand son front se relevait et qu'un rayon du jour venait l'éclairer, l'harmonie et la sérénité de ses traits, sa carnation ferme et colorée, disaient assez que c'était dans le mouvement et le grand air et non sous les verrous qu'elle avait vécu.

No ; we should only employ it to soften the too severe execution of the law, or to correct the mistakes of the courts of justice."

"Sire," answered Joséphine, repressing a burst of laughter, "you will grant me, however, the favour I ask of your Majesty."

"I doubt it !"

"I implore you to dismiss two oppressors ! Let them be deprived of their place ! Driven out, dragged out, if necessary !"

"You, Joséphine, urge me to punish ? and of whom are you speaking ?"

"Of two paving-stones, sire, which are in the way in a courtyard."

And Joséphine told at length the story of the prisoner and his flower.

1. Jetzt hörte man das Geräusch des nahenden Zuges, Trompeten und Trommeln mischten sich in das Zujauchzen der Menge, der Hufschlag der Rosse tönte im Hof des Palastes, näher und näher rauschten die Tritte der Kommenden, die Thüren des Saales flogen auf, und durch die Reihen der niederfallenden Diener eilte der Sultan, an der Hand seines Sohnes, vor den Thron der Mutter. 14

'Hier,' sprach er, bringe ich Dir den, nach welchem Du Dich so lange gesehnt hast."

Die Sultanin fiel ihm in die Rede. "Das ist mein Sohn nicht!" rief sie aus. "Das sind nicht die Züge, die mir der Prophet im Traume gezeigt hat!"

Gerade, als ihr der Sultan ihren Aberglauben verweisen wollte, sprang die Thüre des Saales auf, Prinz Omar stürzte herein, verfolgt von seinen Wächtern, denen er sich mit Anstrengung aller seiner Kraft entrissen hatte; er warf sich athemlos vor dem Throne nieder. "Hier will ich sterben, lass mich tödten, grausamer Vater; denn diese Schmach dulde ich nicht länger." Alles war bestürzt über diese Reden, man drangte sich um den Unglücklichen her, und schon wollten ihn die herbeieilenden Wachen ergreifen und ihm wieder seine Bande anlegen, als die Sultanin, die in sprachlosem Erstaunen dies alles mit angesehen hatte, von dem Throne aufsprang. 'Haltet ein,' rief sie. "Dieser und kein Anderer ist der rechte. Dieser ist's, den meine Augen nie gesehen und den mein Herz doch erkannt hat."

Nineteen hundred years ago the islands of Great Britain were inhabited by a race of savages living in caves and huts thatched with straw, and feeding large herds of cattle. They subsisted mostly upon milk, or flesh procured by the chase. What clothes they wore were chiefly composed of the skins of beasts; but the greater part of their bodies were left naked, and painted to make them appear more terrible in battle. The greater part of the country was covered with immense forests, and the rest was chiefly moor or marsh, very little being cultivated.

But yet, to the careful observer, Assam affords studies of absorbing interest. Its past lies obscured in the dimness of Hindu mythology; its future holds out bright promise of moral and material welfare, thanks to the civilizing influence of British rule, while the large admixture of non-Aryan blood gives to the people of Assam a peculiarity all their own. It is noteworthy that Assam continued a Hindu kingdom up to within the memory of men still living; that, while other more powerful provinces of India were one by one subdued by the arms of Islam, the Assamese kings drove away the Muhammadan invaders with ignominy. The head of one Muhammadam leader, named Turbuk, with that of his colleague, Nawab Khush Lal Khan, was carried to Garhgaon, and formed part of a chaplet of skulls exposed by the victorious Ahom on one of the hills near his capital.

The whole plot of one of the great epic poems, Ramayana, rests on a rash promise given by the king to his second wife. After the father's death the son of the second wife declines the throne, and comes to Rama to persuade him to accept the kingdom of his father. But all in vain.

"The royal rule," he says, "is in its essence truth. On truth the world is based. The chief element in virtue is truth. All things are based on truth ; nothing is higher than it. Why, then, should I not be true to my promise, and faithfully observe the truthful injunction given by my father."

They live chiefly by trade, or till small plots of land, and form a very respectable, although not a numerous class.

(*b.*) There are also two hill tribes. They live in leaf-huts in the recesses of the forests, and earn a precarious livelihood by bringing jungle products, firewood, and bamboos to the markets in the plains. They cultivate cotton in small quantities, and various kinds of peas and pulse, such as *mug*, *arhar*, and *chana*. Within the District of Puri there are no predatory castes, properly so called. There is a class of people who wander about begging from village to village, singing and dancing for the amusement of the peasantry. They are skilful bird-catchers, and make money by inducing the humane Hindus to pay them a trifle, offering to release the birds caught by them on the condition of being paid.

The solid earth, and from the strata there
Extract a register by which we learn,
That he who made it, and revealed its date
To Moses, was mistaken in its age.

Contrive creation; travel nature up
To the sharp peak of her sublimest height,

Of eye and ear,—*both what they half create*
And what perceive; well pleased to recognise

FRENCH TEXTS.

Examiner—Miss Adams.

1. Translate into French:—

"I must tell you a little anecdote, which is quite true, and will amuse you. The king has lately been trying his hand at making verses: one day he said to Gramont, 'Will you read this little poem, and tell me if you have ever seen anything so absurd. Just because they know I like verses, they bring me some of all sorts.' The field-marshal read it, and said 'Sire, your Majesty is a judge of everything; certainly this is the most absurd and silly madrigal I have ever seen.' 'Must not 8

the man who wrote it be very conceited?' said the king, laughing. 'Sire, I can really call him nothing else.' 'Well,' said the king, 'I am delighted that you have spoken so frankly; I wrote the poem.' 'Ah, sire, will your Majesty let me see it again, I read it only hastily.' 'No, first impressions are always the most correct.' My comment on this story is, that the king is very far from ever hearing the truth."

2. Translate into idiomatic English:

"Ma douleur serait bien médiocre si je pouvais vous la dépeindre: je ne l'entreprendrai pas aussi. J'ai beau chercher ma chère fille, je ne la trouve plus, et tous les pas qu'elle fait l'éloignent de moi. Je m'en allai donc à Sainte-Marie, toujours pleurant et toujours mourant; il me semblait qu'on m'arrachait le cœur et l'âme; et en effet, quelle rude séparation! Je demandai la liberté d'être seule; on me mena dans la chambre de madame du Housset, on me fit du feu; Agnès me regardait sans me parler, c'était notre marché: j'y passai jusqu'à cinq heures sans cesser de sanglotor; toutes mes pensées me faisaient mourir. J'écrivis à M. de Grignan, vous pouvez penser sur quel ton. Cette chambre où j'entrais toujours hélas! j'en trouvai les portes ouvertes, mais je vis tout d'émeublé, tout dérangé et votre pauvre petite fille qui représente la mienne. Les réveils de la nuit ont été noirs, et le matin je n' étais pas avancée d'un pas pour le repos de mon esprit. Le soir, je reçus votre lettre, qui me remit dans les premiers transports." 6

20 I am Raphael, one of the seven holy angels which present the prayers of the saints, and which go in and out before the glory of the Holy One. Then they were both troubled, and fell upon their faces; for they feared. But he said unto them, Fear not, for it shall go well with you; praise God therefore. Fear not of any favour of mine, but by the will of our God I came: wherefore praise him for ever. All these days I did appear unto you; but I did neither eat nor drink, but ye did see a vision. Now therefore give God thanks; for I go up to him that sent me; but write all things which are done in a book. And when they arose, they saw him no more. Then they confessed the great and wonderful works of God, and how the angel of the Lord had appeared unto them. Then Tobit wrote a prayer of rejoicing, and said, Blessed be God that liveth for ever, and blessed be his kingdom, For he doth scourge, and hath mercy; he leadeth down to hell, and bringeth up again: neither is there any that can avoid his hand. Confess him before the Gentiles, ye children of Israel: for he hath scattered us among them. There declare his greatness, and extol him before all the living: for he is our Lord, and he is the God our Father for ever.

לְעוֹלָם : יְהוָה עֹז לְעַמּוֹ יִתֵּן יְהוָה יְבָרֵךְ אֶת־עַמּוֹ בַּשָּׁלוֹם :

5. Translate into Hebrew, writing all the vowel-points :

a. O all ye works of the Lord, bless ye the Lord : praise Him, and magnify Him for ever. 8
O ye angels of the Lord, bless ye the Lord : praise Him and magnify Him for ever.
O ye heavens, bless ye the Lord : praise Him, and magnify Him for ever.
O ye waters that be above the firmament, bless ye the Lord : praise Him, and magnify Him for ever.
O all ye powers of the Lord, bless ye the Lord : praise Him, and magnify Him for ever.
O ye sun and moon, bless ye the Lord : praise Him, and magnify Him for ever.
O ye showers and dew, bless ye the Lord : praise Him, and magnify Him for ever.
O ye winds of God, bless ye the Lord : praise Him and magnify Him for ever.
O ye fire and heat, bless ye the Lord : praise Him, and magnify Him for ever.

b. The souls of the righteous are in the hand of God, and there shall no torment touch them. In the sight of the unwise they seemed to die : and their departure is taken for misery ; and their going from us for utter destruction ; but they are in peace. For though they be punished in the sight of men, yet is there hope full of immortality. And having been a little chastised, they shall be greatly rewarded : for God proved them, and found them worthy for Himself. As gold in the furnace hath He tried them, and received them as a burnt-offering. They shall judge the nations, and have dominion over the people, and their Lord shall rule for ever. 12

Every Indian village is a collection of families united in intimate relations. And as each family is held together by a close interdependence of interests under a common father, so the members of each village community are united in close association under a presiding head-man or chief of some kind. It must be borne in mind that the actual tillers of the ground in an Indian village constitute at least three-fourths of the population. The remaining inhabitants consist of various useful functionaries, artisans, mechanics—men of distinct castes and employments, to be presently described. They are indispensable to the maintenance of every society, and minister to its wants in diverse ways.

Having alighted from my horse, I went to the Magistrate's court to see with my own eyes the manner in which criminal cases were settled in India. It was about one o'clock when I reached the court, and I was surprised to see the great crowd of people that were waiting in the adjoining grounds. On one side I saw a group of court officials conversing together; on another, six or seven men sitting down smoking; and near the gate four policemen were dragging an unfortunate prisoner into the place. Three of them were pulling him by a rope, with which his hands were bound, and the fourth followed

with a stick, which he frequently applied on the wretched man's back.

Futteh Shah is said to have been possessed of a good natural understanding, which he much improved by study, and finding that the Abyssinian slaves and the eunuchs of the palace, during the reigns of his predecessors, had gained too much influence, and had been guilty of improper practices, he punished some of them severely, and reduced them all to a level with his other servants and subjects. This conduct of the king gave much offence to the eunuchs; they seduced the corps of guards called Paiks (infantry armed with swords and spears), 5000 of whom daily mounted guard over the palace, and one night murdered their master in the seraglio.

First Honour Paper.

The figures in the margin indicate full marks.

1. Refer to passages in *Hamlet*, in *Cymbeline*, and in *Antony and Cleopatra* which show that the character and history of Julius Cæsar had taken a strong hold upon Shakspere's imagination. What deviations from actual history do we find in *Julius Cæsar*, and what misconception as to the relations between Cæsar and Marcus Brutus? 4 2

2. It has been remarked that the play of *Julius Cæsar* might be more fitly called after Brutus than after Cæsar; consider fully the arguments upon which this idea rests. State some of the reasons which have been put forward in explanation of the fact that in *Julius Cæsar* Shakspere's delineation of Cæsar's character is a partial and one-sided delineation. Discuss the character of Antony as exhibited in *Julius Cæsar*. 5 3 4

3. "The wit of Portia is like attar of roses ..... the wit of Beatrice is like sal-volatile": expand these remarks by a reference to the incidents and developments of the *Merchant of Venice* and *Much Ado about Nothing*. Also consider the character of Jessica in itself, and in its relation to that of Portia. 6 3

4. In *Much Ado* show, as to the plot and the characters, how much is derived and how much original. Refer to a scene in *Much Ado* in which the effect produced in representation would differ from that produced in reading. With what object are the 2 2 2

burlesque scenes of the Constables introduced? Instance other plays of Shakspere in which comic interludes are employed for the same purpose. 2

5. Show, from a consideration of the spirit of *L'Allegro* and *Il Penseroso*, in what respects Milton was at variance with the religious party to which he belonged, and illustrate your answer by quotations from both poems. Of which class of poetry is *Lycidas* an imitation? Refer to and account for incongruities of subject to be found in the poem. In what respects as to subject and character do Milton's Sonnets differ from their prototypes? 4 2 3 2

6. Point out in what way the social condition of England determined the character of Dryden's poetry. What natural deficiencies prevented his excelling in dramatic writing? What was Pope's conception of the poetic art? Criticize, as a work of art, the present form of the *Rape of the Lock*. Selecting any one of Gray's poems, point out its chief beauties and defects. 3 2 2 3 3

7. Annotate the following passages, and in regard to the first five, point out the immediate context:

(*a.*) And, in some taste, is Lepidus but so; 5
He must be taught and train'd and bid go forth
A barren-spirited fellow; one that feeds
On abject orts and imitations,
Which, out of use, and stal'd by other men,
Begin his fashion: do not talk of him
But as a property.

(*b.*) Even by the rule of that philosophy 6
By which I did blame Cato for the death
Which he did give himself, I know not how,
But I do find it cowardly and vile,
For fear of what might fall, so to prevent
The time of life: arming myself with patience
To stay the providence of some high powers
That govern us below.

(*c.*) I would she were as lying a gossip in that as ever 4
knapped ginger or made her neighbours believe she wept for the death of a kind husband. But it is true, without any slips of prolixity or crossing the plain high way of talk, that the good Antonio, the honest Antonio,—O that I had a title good enough to keep his name company!

(*d.*) Look how the floor of heaven 5
Is thick inlaid with patines of bright gold;
There's not the smallest orb which thou behold'st
But in his motion like an angel sings,
Still quiring to the young-eyed cherubins;
Such harmony is in immortal souls;
But whilst this muddy vesture of decay
Doth grossly close it in, we cannot hear it.

(*e.*) So will it fare with Claudio; 6
When he shall hear she died upon his words
The idea of her life shall sweetly creep
Into his study of imagination,

And every lovely organ of her life
Shall come apparell'd in more precious habit,
More moving-delicate and full of life,
Into the eye and prospect of his soul
Than when she lived indeed.

In the above extracts, mention any various readings.

(*f.*) And he, by friar's lantern led, 4
Tells how the drudging goblin sweat
To earn his cream-bowl duly set,
When, in one night, ere glimpse of morn,
His shadowy flail had thresh'd the corn
That ten day-labourers could not end. 4

(*g.*) Next Camus, reverend sire, went footing slow,
His mantle hairy, and his bonnet sedge,
Inwrought with figures dim, and on the edge
Like to that sanguine flower inscribed with woe.

(*h.*) At last divine Cecilia came 4
Inventress of the vocal frame;
The sweet enthusiast, from her sacred store,
Enlarged the former narrow bounds,
And added length to solemn sounds
With nature's mother-wit, and arts unknown before.

(*i.*) Brown skeletons of leaves that lag 3
My forest-brook along;
When the ivy-tod is heavy with snow,
And the owlet whoops to the wolf below,
That eats the she-wolf's young.

Let us be widows to our woes; delay
Commends us to a famishing hope.

(*b.*) Bear 'em speedily 6
From our kind air,—to them unkind,—and minister
What man to man may do; for our sake more,
Since I have known frights, fury, friends' behests.
Love's provocations, zeal, a mistress' task,
Desire of liberty, a fever, madness,
Hath set a mark—which nature could not reach to
Without some imposition,—sickness in will,
Or wrestling strength in reason.

And steady bliss, and all the loves
Now sleeping in these peaceful groves.

All powers that serve the bright-eyed queen
Are confident and gay;
Clouds at her bidding disappear;
Points she to aught? the bliss draws near,
And Fancy smooths the way.

(*c.*) This tract which the river of Time 3
Now flows through with us, is the plain.
Gone is the calm of its earlier shore.
Border'd by cities, and hoarse
With a thousand cries is its stream.
And we on its breast, our minds
Are confused as the cries which we hear,
Changing and shot as the sights which we see.

(*d.*) "I knew not yet the gauge of time, 5
Nor wore the manacles of space;
I felt it in some other clime,
I saw it in some other place.
'Twas when the heavenly house I trod,
And lay upon the breast of God."

5. Find the resultant vertical pressure of a liquid on a surface in contact with it. 14

A solid cone is completely immersed so that its vertex is at a depth h and its axis inclined at an angle θ to the vertical, find the pressure on a half of the surface made by a plane through the axis perpendicular to the plane containing the vertex and the highest and lowest points of the base.

6. Find the condition of equilibrium of a body partly immersed in liquid and having one point fixed. 15

A rectangular board ABCD (density ρ) with its plane vertical has A fixed, B and C under the surface, and D on the surface of a liquid of density σ. If k be the length of the part of AB above the surface, and the lengths of the sides be a and b shew that

$$\frac{\rho}{\sigma} = 1 - \frac{k}{3b} \cdot \frac{a^2 - k^2}{a^2 - bk}.$$

7. Find the depth of the centre of pressure of a triangle with a corner in the surface and its base horizontal. 14

ABCD is a quadrilateral with right angles at B and C, if AD be on the surface and the plane of the quadrilateral vertical, find the depth of the centre of pressure.

8. A hollow cone full of air at atmospheric pressure is allowed to rest on the surface of water vertex upwards, allowing for the weight of the air, how deep will it sink? 10

1. Find the angle between the lines represented by the equation $ax^2 + 2hxy + hy^2 = 0$, and find the equation of the straight lines bisecting the angles between these lines. 10

2. Prove that the locus of a point at which two given circles subtend equal angles is a coaxal circle. Explain this statement (1) when the circles are equal, and (2) when they are concentric. 10

3. Work out the condition that the line $\lambda x + \mu y + \nu = 0$ may move so as always to touch the conic $ax^2 + 2hxy + by^2 + 2gx + 2fy + c = 0$. 10

4. Find the locus of a point such that the tangents from it to the ellipse $\frac{x^2}{a^2} + \frac{y^2}{b^2} - 1 = 0$ may always cut each other at an angle of 60°. 10

5. Show that if through any point on an equilateral hyperbola be drawn two chords at right angles to each other then the perpendicular let fall from the point on the line joining their extremities is the tangent to the curve. 10

6. Find the coordinates of the intersection of the normals at the points $x'y'$, $x''y''$ to the parabola $y^2=4mx$: hence find the equation of the evolute. 10

7. If x_1y_1, x_2y_2, x_3y_3, x_4y_4 be the coordinates of the feet of the four normals drawn from a point xy to the ellipse $\frac{x^2}{a^2}+\frac{y^2}{b^2}-1=0$, prove that $\frac{x_1x_2x_3x_4}{x^2}$ and $\frac{y_1y_2y_3y_4}{y^2}$ are constant. 10

8. Given two conjugate semidiameters of an ellipse in magnitude and position, construct the axes in magnitude and position. 10

9 If the circle $x^2+y^2+2gx+2fy+c=0$ be cut orthogonally by the circle $x^2+y^2+2g'x+2f'y+c'=0$, find the relation between the constants. 10

10. Given n fixed right lines and a fixed point O, if through this point any radius vector be drawn meeting the lines in the points R_1, R_2, R_3, &c., and on this radius vector a point R be taken, or that $\frac{n}{OR}=\frac{1}{OR_1}+\frac{1}{OR_2}+\frac{1}{OR_3}+$ &c., find the locus of R. 10

1. Define a limit, and find the limit of $\frac{a^h-1}{h}$ when h becomes indefinitely small. 8

Find the differential coefficient of x^m when m is any real quantity.

2. Prove that the remainder after expanding $f(x+h)$ to n terms by Taylor's theorem is $\frac{h^n}{\lfloor n}f^n(x+\theta h)$. 12

Expand $(1+x)^{\frac{1}{x}}$ to four terms.

3. If $x=r\cos\theta$, $y=r\sin\theta$, show that— 10

$$r\frac{du}{dr}=x\frac{du}{dx}+y\frac{du}{dy}$$

$$\frac{du}{d\theta}=x\frac{du}{dy}-y\frac{du}{dx}.$$

If $u=\phi(X, Y)$ where $X=ax+by$, $Y=a'x+b'y$,

$$\text{then } \frac{du}{dX}=a\frac{du}{dX}+a'\frac{du}{dY}$$

$$\frac{du}{dy}=b\frac{du}{dX}+b\frac{du}{dY}.$$

4. Prove the formulæ— 14

$$\frac{1}{p^2}=n^2+\left(\frac{du}{d\theta}\right)^2$$

$$\text{and } \rho=r\frac{dr}{dp}.$$

In the curve $r^m=a^m \sin m\theta$, show that $p=\frac{r^{m+1}}{a^m}$.

Apply this to the lemniscate of Bernoulli, and find the radius of curvature at any point of its first positive pedal.

5. Find the asymptote of the curve— 14

$$x^3+3x^2y+3xy^2+2y^3=x^2+y^2+x.$$

Trace the curves—

(1) $y^2+2x^2y+x^7=0$.

(2) $r=a+b\cos\theta$.

6. Integrate— 12

$$\int\sqrt{a^2+x^2}\,dx, \qquad \int\frac{dx}{a+b\cos x}.$$

(*a.*) Horum alii, sicuti iste ipse Mnesarchus, hos, quos nos 24
oratores vocaremus, nihil esse dicebat nisi quosdam operarios lingua celeri et exercitata; oratorem autem, nisi qui sapiens esset, esse neminem; atque ipsam eloquentiam, quod ex bene dicendi scientia constaret, unam quamdam esse virtutem et, qui unam virtutem haberet, omnes habere easque esse inter se æquales et pares; ita, qui esset eloquens, eum virtutes omnes habere atque esse sapientem. Sed hæc erat spinosa quædam et exilis oratio longeque a nostris sensibus abhorrebat.

Charmadas vero multo uberius eisdem de rebus loquebatur, non quo aperiret sententiam suam; hic enim mos erat patrius

Academiæ adversari semper omnibus in disputando; sed quum maxime tamen hoc significabat, eos, qui rhetores nominarentur et qui dicendi præcepta traderent, nihil plane tenere neque posse quemquam facultatem adsequi dicendi, nisi qui philosophorum inventa didicisset.

Illud vero fuit horribile, quod mehercule vereor ne majorem vim ad deterrendum habuerit quam ad cohortandum. Voluisti enim in suo genere unam quemque nostrum quasi quemdam esse Roscium; dixistique non tam ea, quæ recta essent, probari, quam quæ prava, fastidiis adhærescere; quod ego non tam fastidiose in nobis quam in histrionibus spectari puto.

(*c.*) Nobis tamen, qui in hoc populo foroque versamur, satis est de moribus hominum et scire et dicere, quæ non abhorrent ab hominum moribus. Quis enim umquam orator magnus et gravis, quum iratum adversario judicem facere vellet, hæsitavit ob eam causam, quod nesciret, quid esset iracundia, fervorne mentis an cupiditas puniendi doloris? Quis, quum cæteros animorum motus aut judicibus aut populo dicendo miscere atque agitare vellet, ea dixit, quæ a philosophis dici solent? Qui partim omnino motus negant in animis ullos esse debere, quique eos in judicum mentibus concitent, scelus eos nefarium facere; partim, qui tolerabiliores volunt esse et ad veritatem vitæ propius accedere, permediocres ac potius leves motus debere esse dicunt.

There is no country in the world where the soil is more fruitful than in Egypt, which is entirely owing to the Nile. For, whereas other rivers, when they overflow lands, wash away and exhaust their vivifying moisture, the Nile, on the contrary, by the excellent slime it brings with it, fattens and enriches them in such a manner as sufficiently compensates for what the foregoing harvest had impaired. The husbandman there never tires himself with the plough or breaking clods of earth. As soon as the Nile retires, all he has to do is to turn up the earth and temper it with sand to lessen its rankness; after which he sows it with ease and at no exponse. Two months after it is covered with all sorts of corn and pulse. The Egyptians generally sow in October and November, according as the waters recede, and their harvest is in March and April.

(Give, if you can, the Syrian names of the months, as commonly used now. Diacritical points are necessary.)

The leading institutions of the Hindus bear evidence that they were devised at a very remote period, when society yet retained its rudest and simplest form. So long as men roam in the pastoral state no division of classes or labour is known. Every individual is a shepherd, and every family provides for itself the commodities with which it is supplied. As soon as the cultivation of land, which yields a more secure and plentiful subsistence, occupies a great share of the common attention, the inconveniences of this universal mixture of employments is speedily felt. The labours of the field are neglected while the

cultivator is engaged at the loom or repelling the incursions of the enemy. His clothing and lodging are inadequately provided for, while the attention of himself and his family are engrossed by the plough

As the writers in poetry and fiction borrow their several materials from outward objects, and join them together at their own pleasure, there are others who are obliged to follow nature more closely, and to take entire scenes out of her. Such are historians, natural philosophers, travellers, geographers, and, in a word, all who describe visible objects of a real existence. It is the most agreeable talent of a historian to be able to draw up his armies and fight his battles in proper expressions, to set before our eyes the divisions, cabals, and jealousies of great men, to lead us step by step into the several actions and events of history. We love to see the object unfold itself by just degrees, and breaking upon us insensibly, that so we may be kept in a pleasing suspense, and have time given us to raise our expectations, and to side with one of the parties concerned in the relation.

The moral world, as consisting of males and females, is of a mixed character, and filled with several customs, fashions, and ceremonies which would have no place in it were there but one sex. Had our species no females in it, men would be quite different creatures from what they are at present: their endeavours to please the opposite sex polishes and refines them out of those manners which are most natural to them, and often sets them upon modelling themselves, not according to the plans which they approve in their own opinions, but according to those plans which they think are most agreeable to the female world. In a word, man would not only be unhappy, but a rude, unfinished creature, were he conversant with none but those of his own make.

Inquiries after happiness and rules for attaining it are not so necessary and useful to mankind as the arts of consolation and supporting one's self under affliction. The utmost we can hope for in this world is contentment; if we aim at anything higher we shall meet with nothing but grief and disappointment. A man should direct all his studies and endeavours at making himself easy now and happy hereafter.

The truth of it is, if all the happiness that is dispersed through the whole race of mankind in this world were drawn together, and put into the possession of any single man, it would not make a very happy thing. Though, on the contrary, if the miseries of the whole species were fixed in a single person, they would make a very miserable one.

2. K. N. Gangooly aged about 21, a native of lower Bengal born in Calcutta, but lived near Umritsar in the Panjab from the age of 7 to 11 or thereabouts, after which he returned to the neighbourhood of Calcutta where he has resided until quite recently. He had never been a day ill in his life until November 1886. He then suffered for about ten days from severe pain in the left side mostly confined to the lumbar and iliac regions, this pain was accompanied by local tenderness.

His medical attendant considered that the attack was of the nature of "inflammation of the bowels," but he had neither constipation nor diarrhœa nor fever so far as he can remember. In the December following he noticed that he passed blood with his urine. He says the blood was of a bright color mixed with the urine and not accompanied by clots. At this time there was absolutely no pain, this condition lasted about a month, and for it he was given gallic acid he thinks. The passage of blood then ceased, but for some time a white copious material passed with the urine, which, when examined, was said to be phosphatic. Thereafter he regained apparently perfect health. Some two months later, that is to say on March 1887, he had some fatiguing work to do preparing for a journey, and he then noticed blood in his urine once more. The quantity

was less than on the previous occasion and was distinctly increased by exertion. He had a dull pain in the left loin and some dragging pain of the testicle. This condition continued on and off for two months, (until May 1887). About this time he took over duties entailing much outdoor active exercise, and he found that whenever he jumped from a height, or got down from a carriage violently, he was attacked with pain of more or less severity over the left loin. The blood also reappeared from time to time in the urine after active exercise.

In October last he had very violent pain in the left side radiating down front and back of the thigh and towards the left testicle. He had no sickness at this time, but has on other occasions felt nausea with the pain. This attack of pain lasted some hours and ceased suddenly.

In November last there were two similar attacks of less severity. In January of this year there was a very violent attack of several hours' duration and accompanied with vomiting. A specimen of urine examined a fortnight later contained a few blood and pus(?) corpuscles but nothing else abnormal.

A careful inspection failed to find any palpable enlargement in the region of the kidney. The prostate seemed normal. The urethra was healthy, and admitted a full-sized sound. Exploration of the bladder gave no evidence of the presence of any foreign body, nor was the somewhat prolonged use of the sound and aspirating catheter followed by any trace of hæmorrhage. All the other organs apparently healthy.

You are required to comment on this case, stating your opinion as to the diagnosis, prognosis, and treatment, and giving in detail the reasons which lead you to the opinion which you may form. 150

ENGLISH I.

Examiner—Mr. F. J. Rowe, M. A.

1. What two opposite views have been offered as to the character of Shakspere? Show, after Dowden, that neither of them can be accepted as a complete statement of the fact.

2. Enumerate the characteristics of form and matter that distinguish the earlier from the later plays of Shakspere. Arrange the Comedies, Histories, and Tragedies of Shakspere in a series of groups, headed 'Early,' 'Middle' and 'Late' respectively, so as to display in chronological order the three separate lines.

Give some instances of symmetrical balance of characterization or action in different plays.

4. Give instances of the introduction of 'secondary plots' in some of Shakspere's plays, and show how they serve to illustrate the main plot in each case. What does Schlegel mean by 'Shakspere's irony'? How does Dowden controvert Schlegel's view of its significance?

5. Upon what evidence is it held that *King John* was not the earliest written of Shakspere's Historical plays? Show how Shakspere has softened down the real facts in the lives and characters of some of the *dramatis personæ* in *King John*; what reason has been assigned for this? Compare or contrast John's behaviour towards Hubert with that of others of Shakspere's historical characters on similar occasions.

Sketch the character of Faulconbridge and state what you conceive to be its dramatic intention.

(*a.*) *Bene* ... . and so I commit you
Claud. To the tuition of God: From my house, if I had it—
D. Pedro. The sixth of July: Your loving friend, Benedick.
Bene. Nay, mock not, mock not. The body of your discourse is some time guarded with fragments, and the guards are but slightly basted on neither; ere you flout old ends any further, examine your conscience.

(*b.*) I would to God some scholar would conjure her; for certainly, while she is here, a man may live as quiet in hell as in a sanctuary; and people sin upon purpose, because they would go thither.

(*c.*) Princes and counties! Surely, a princely testimony, a goodly count, Count Confect; a sweet gallant, surely!

(*d.*) my face so thin
That in mine ear I durst not stick a rose
Lest men should say 'Look where three-farthings goes.'

(*e.*) The better act of purposes mistook
Is to mistake again; though indirect,
Yet indirection thereby grows direct,
And falsehood falsehood cures.

(*f.*) Death having preyed upon the outward parts
Leaves them invisible.

(*g.*) O then we bring forth weeds,
When our quick minds lie still; and our ills told us
Is then our only earing.

(*h.*) Yon ribaudred nag of Egypt—
Whom leprosy o'ertake—i' the midst of the fight
When vantage like a pair of twins appear'd
Both as the same or rather ours the elder,

Examiner—MR. S. C. HILL, B. A., B. Sc.

1. Give an account of the life of Marlowe, with a brief description of his principal works. In what points does his "Edward II" shew an improvement upon the style of his earlier dramas, and what position does it hold in the history of the English Historical Drama?

2. Quote instances of classical allusion in "Edward II." To what peculiarity in the origin of the English Drama does the frequent use of such allusions point? Criticize Ward's remark to the effect that Marlowe has failed in his depiction of the character of the Queen. Describe the characters of Gaveston and Prince Edward.

3. What was the original plan of the "Fairie Queen"? How far was this completed by Spenser? Kitchin remarks that "two allegories underlie this tale." Explain this in regard to the characters of Gloriana, Arthur, the Red Cross Knight, Duessa, Una, Orgoglio, Artegal, and Archimago. Name other allegories dealing with the same subject as Spenser's description of the Castle of Alma.

4. Discuss Hallam's remark, "Spenser seems to have been sometimes deficient in one attribute of a great poet, the continued reference to the truth of nature, so that his fictions should be

always such as might exist on the given conditions," and account for the comparative neglect into which the "Fairie Queen" has now fallen. What peculiarity is there in Spenser's use of Classical Mythology?

5. What other subjects from the life of Christ, besides the Temptation, did Milton contemplate as suitable for poetic treatment? What is meant by calling "Paradise Regained" a model of the shorter epic? Mention the passages in the Bible which form the authorities for this poem.

6. Masson says that "Paradise Regained" can be properly understood, only by bearing in mind the fact that it was a sequel to "Paradise Lost." Shew in what way it was a sequel to that poem, and justify Milton's use of so general a title as "Paradise Regained" for a poem dealing with a single incident in the life of Christ. What difference is there in the character of Satan as depicted in "Paradise Lost" and as depicted in "Paradise Regained"? Discuss Lamb's objection to the too "civic and culinary" nature of the banquet offered by Satan to Christ in the wilderness.

7. Mention any poems by Tennyson other than the "Idylls of the King," in which he treats of subjects from Arthurian Legend. From what authorities did he draw materials for the "Idylls", and in what form were the latter published? Is there any variation in the character of Arthur as represented in the different Idylls?

8. Give a short summary of the "Idylls", shewing clearly the underlying purpose. What is Swinburne's idea of the real moral of the Arthurian Legend? How far has Tennyson followed Malory in his interpretation? What are the chief characteristics of Tennyson's style? Discuss the absence of originality which Taine imputes to him.

9. Annotate the following passages:—

(*a.*) This totter'd ensign of my ancestors,
Which swept the desert shores of that Dead Sea
Whereof we got the name of Mortimer.

(*b.*) For now we hold an old wolf by the ears,
That, if he slip, will seize upon us both,
And gripe the sorer, being grip'd himself.

(*c.*) All in a silken Camus lylly whight,
Purfled upon with many a folded plight,
Which all above besprinckled was throughout,
With golden aygulets.

(*d.*) For what art thou,
That mak'st thyselfe his dayes-man, to prolong
The vengeaunce prest?

(*e.*) Hither came Joseph of Arimathy,
Who brought with him the holy grayle.

(*f.*) That hath been thy craft
By mixing somewhat true to vent more lies.

(*g.*) Remember the Pellean conqueror,
A youth, how all the beauties of the East,
He slightly viewed, and slightly overpassed;
How he surnamed of Africa dismissed,
In his prime youth, the fair Iberian maid.

(*h.*) The wisest, unexperienced, will be ever
Timorous, and loth, with novice modesty
(As he who, seeking asses, found a kingdom)
Irresolute, unhardy, unadventurous.

(*i.*) Last in a roky hollow, belling, heard
The hounds of Mark.

(*j.*) No more subtle master under heaven
Than is the maiden passion for a maid.

(*k.*) I could not breathe in that fine air,
That pure severity of perfect light—
I wanted warmth and colour which I found
In Lancelot.

(*l.*) Tumbling the hollow helmets of the fallen,
And shiver'd brands that once had fought with Rome,

(*b.*) That noble prince ..... of whom it was usually said, that he was the greatest usurer in France, because he had turned all his estate into obligations.

(*c.*) Poesy doth raise the mind, by submitting the shows of things to the desires of the mind : whereas reason doth buckle and bow the mind unto the nature of things.

7. Explain the allusions in the following passages, and point out the connection of each passage with its context:—

(*a.*) Gebir, my old freemason, and prince of plasterers at Babel, bring in your trowel, most Ancient Grand! You have a claim to a seat here at my right hand, as patron of the stammerers.

(*b.*) I cannot image to myself whereabouts you are. When I try to fix it, Peter Wilkins's island comes across me. Sometimes you seem to be in the Hades of Thieves. I see Diogenes prying among you with his perpetual fruitless lantern.

(*c.*) His pots and his ladles are as grand and primal as the seething-pots and hooks seen in old prophetic vision. A tub of butter, contemplated by him, amounts to a Platonic idea. He understands a leg of mutton in its quidditty.

(*d.*) The individual rabble had damned a slight piece of mine but a few nights before, and I was determined the culprits should not a second time put me out of countenance.

(*e.*) Honest Radhamanth ..... after a lenient castigation, with rods lighter than of those Medusean ringlets, but just enough to "whip the offending Adam out of thee," shall courteously dismiss thee at the right-hand gate—the O. P. sides of Hades.

(*f.*) At another part of the table, Shrove Tuesday was helping the second of September to some cock-broth—which courtesy the latter returned with the delicate thigh of a hen-pheasant—so there was no love lost for that matter.

8. (*a.*) "Defoe's novels are simply history *minus* the facts: Richardson's are a series of letters *minus* the correspondents." (*b.*) "Scott works from the skin inwards;" "Defoe looks at his actors from the outside;" "Richardson seems scarcely content even with drawing his characters as large as life."—Discuss, in the light of the above statements made by Mr. Leslie Stephen, (*a*) the "accidental" origin of the English novel from the "art of Lying;" and (*b*) Scott's, Defoe's, and Richardson's respective methods of character-painting. Illustrate these methods from your reading.

9. (*a.*) "Sir Thomas Browne's habitual mood is determined by an attraction towards the two opposite poles of humour and mysticism." "As a general rule the talk of a great man is the

reflection of his books; but on turning from Johnson's life to his writings the shock is trying to our nerves." "De Quincey stands absolutely alone as the inventor and sole performer on a new musical instrument—for such an instrument is the English language in his hands." Criticise the salient points in the prose of these three writers, indicated by the above extracts. (*b.*) Mr. Leslie Stephen finds a "melancholy" in the tone of the writings of all three, but each wears his melancholy "with a difference":—point out this difference in each case.

10. Quis melior plorante gula? Ergo omnia fiunt,
Si nescis, ut per lacrimas effundere bilem
Cogaris pressoque diu stridere molari.
Tu tibi liber homo et regis conviva videris:
Captum te nidore suae putat ille culinae,
Nec male conjectat. Quis enim tam nudus ut illum
Bis ferat, Etruscum puero si contigit aurum
Vel nodus tantum et signum de paupere loro?

1. Translate the following passage (from an author not prescribed) :

Pompey and Cæsar compared.

Nec quenquam jam ferre potest, Caesarve priorem
Pompeiusve parem. Quis justius induit arma,
Scire nefas : magno se judice quisque tuetur :
Victrix causa Deis placuit, sed victa Catoni.
Nec coiere pares : alter vergentibus annis
In senium, longoque togae tranquillior usu
Dedidicit jam pace ducem : famaeque petitor
Multa dare in vulgus : totus popularibus auris
Impelli, plausuque sui gaudere theatri :
Nec reparare novas vires, multumque priori
Credere fortunae. Stat magni nominis umbra.
Qualis frugifero quercus sublimis in agro
Exuvias veteres populi, sacrataque gestans
Dona ducum : nec jam validis radicibus haerens

Pondere fixa suo est: nudosque per aera ramos
Effundens, trunco, non frondibus efficit umbram:
At quamvis primo nutet casura sub Euro,
Tot circum silvae firmo se robore tollant,
Sola tamen colitur. Sed non in Caesare tantum
Nomen erat, nec fama ducis: sed nescia virtus
Stare loco: solusque pudor non vincere bello.
Acer et indomitus: quo spes, quoque ira vocasset,
Ferre manum, et nunquam temerando parcere ferro:
Successus urgere suos: instare favori
Numinis: impellens quicquid sibi summa petenti
Obstaret: gaudensque viam fecisse ruina.

2. Classify fully the Aryan family of languages. "Latin was but one of the many Italic dialects." Give some account of some of these, and state what remains of any of them are still extant.

3. A. Give examples of the old form of the Latin ablative, and point out traces in Latin of a locative case. Explain Sayce's statement that "the whole of the so-called 5th declension in Latin has arisen from the unconscious blunders of speech."

B. What was the Latin infinitive originally? Analyse and explain (giving examples) the Latin construction of the accusative with the infinitive. Account for the form *alumnus*.

4. Sketch in outline the civilization of the early Aryan community, indicating the nature of the evidence upon which our knowledge of it rests.

"The world of mythology is the creation of language. A myth, as a general rule, is but a faded metaphor and misinterpreted expression." Elucidate this statement fully. Analyse, from this point of view, the myth of Prometheus.

1. (*a*). Qualem autem deum intellegere non possumus nulla virtute praeditum? Quid enim? prudentiamne deo tribuemus, quae constat ex scientia rerum bonarum et malarum et nec bonarum nec malarum? Cui mali nihil est nec esse potest, quid huic opus est dilectu bonorum et malorum? quid autem ratione? quid intelligentia? quibus utimur ad eam rem, ut apertis obscura adsequamur: et obscurum deo nihil potest esse. Nam justitia, quae suum cuique distribuit, quid pertinet ad deos? hominum societas et communitas, ut vos dicitis, justitiam procreavit. Temperantiam autem constat ex pretermittendis voluptatibus corporis, cui locus in caelo est, est etiam voluptatibus, nam fortis deus intellegi qui potest in dolore, an in labore, an in periculo, quorum deum nihil attingit? Nec ratione igitur utentem nec virtute ulla preditum deum intellegere qui possumus?

(*b*). Quis enim hunc hominem dixerit, qui, cum tam certos caeli motus, tam ratos astrorum ordines tamque inter se omnia connexa et apta viderit, neget in his ullam inesse rationem eaque casu fieri dicat, quae quanto consilio gerantur nullo consilio adsequi possumus? An cum machinatione quadam moveri aliquid videmus, ut sphaeram, ut horas, ut alia permulta, non dubitamus quin illa opera sint rationis; cum autem impetum caeli cum admirabili celeritate moveri vertique, videmus constantissime conficientem vicissitudines, anniversarias cum summa salute et conservatione rerum omnium, dubitamus quin ea non solum ratione fiant, sed etiam excellenti divinaque ratione? Licet enim jam remota subtilitate disputandi oculis quodam modo contemplari pulchritudinem rerum earum, quas divina providentia dicimus constitutas.

(*c*). Hunc deum rite beatum dixerimus, vestrum vero laboriosissimum, sive enim ipse mundus deus est, quid potest esse minus quietum quam nullo puncto temporis intermisso versari circum axem caeli admirabili celeritate? nisi quietum autem nihil beatum est; sive in ipso mundo deus inest aliquis, qui regat, qui gubernet, qui cursus astrorum, mutationes temporum, rerum vicissitudines ordinesque conservet, terras et maria contemplans hominum commoda vitasque tueatur ne ille est implicatus molestis negotiis et operosis! Nos autem beatam vitam in animi securitate et in omnium vacatione munerum ponimus; docuit enim nos idem, qui cetera, natura effectum esse mundum; nihil opus fuisse fabrica, tamque eam rem esse facilem, quam vos effici negatis sine divina posse sollertia, ut innumerabilis natura mundos effectura sit, efficiat, effecerit. Quod quia quem ad modum natura efficere sine, aliqua mente possit, non videtis, *ut tragici poetae, cum explicare argumenti exitum non potestis, confugitis ad deum*, cujus operam profecto non desideraretis, si immensam et interminatam in omnis partis magnitudinem regionum videretis, in quam se iniciens animus et intendens

Cum poetarum autem errore conjungere licet portenta magorum Aegiptiorumque in eodem genere dementiam, tum etiam volgi opiniones, quae in maxima inconstantia veritatis ignoratione versantur. Ea qui consideret quam inconsulte ac tenere dicantur, venerari Epicurum et in eorum ipsorum numero, de quibus haec quaestio est, habere debeat: solus enim vidit primum esse, quod in omnium animis eorum notionem impressisset ipsa natura, Quae est enim gens, aut quod genus hominum, quod non habeat sine doctrina anticipationem quandam eorum? quam appellat προλῆψιν Epicurus, id est anteceptam animo rei quandam informationem, sine qua nec intellegi quicquam nec quaeri, nec disputari potest, cujus rationis vim atque utilitatem ex illo caelesti Epicuri de regula et judicio volumine accepimus.

1. (*a*). At Romae nihil trepidationis; *Ceriales ludi* ex more spectabantur. Ut *cessisse* Othonem, et a Flavio Sabino praefecto urbis, quod erat in urbe militum, sacramento Vetellii adactum certi auctores in theatrum adtulerunt, Vitellio plausere; populus cum lauru

ac floribus Galbae imagines circum templa tulit, congestis in modum tumuli coronis juxta lacum Curtii, quem locum Galba moriens sanguine infecerat. In senatu cuncta longis aliorum principatibus *composita* statim decernuntur. Additae erga Germanicum exercitum laudes gratesque, et missa legatio quae gaudio *fungeretur*. Recitatae Fabii Valentis epistolas ad consules scriptae haud immoderate: gratior Caecinae modestia fuit, quod non scripsisset. Ceterum Italia gravius atque atrocius quam bello afflictabatur. Dispersi per municipia et colonias Vitelliani spoliare, rapere, vi et stupris polluere. In omne fas nefasque avidi aut venales non sacro, non profano abstinebant. Et fuere qui inimicos suos *specie* militum interficerent.

Write a brief note on each of the italicised expressions.

(*b*). Nullam caedem Otho majore laetitia excepisse, nullum caput tam insatiabilius oculis perlustrasse dicitur, seu tum primum levata omni sollicitudine mens vacare gaudio ceperat, seu recordatio majestatis in Galba, amicitiae in Tito Vinio quamvis inmitem animum imagine tristi confuderat. Pisonis ut inimici et aemuli caede laetari jus fasque credebat. Praefixa contis capita gestabantur, inter signa cohortium juxta aquilam legionis, certatim ostentantibus cruentas manus qui occiderant qui interfuerant, qui vere qui falso ut pulchrum et memorabile facinus jactabant. Plures quam centum viginti libellos praemium exposcentium ob aliquam notabilem illa die operam Vitellius postea invenit; omnesque conquiri et interfici jussit, non honore Galbae, sed tradito principibus more, *munimentum* ad praesens in posterum *ultionem*.

Explain the construction of *munimentum* and of *ultionem*.

(*c*). Trepidam urbem, ac simul atrocitatem recentis sceleris, simul veteres Othonis mores paventem, novus insuper de Vitellio nuntius exterruit ante caedem Galbae suppressus, ut tantum superioris Germaniae exercitum descivisse crederetur.

(*d*). Mox vocata contione, majestatem urbis et consensum populi ac senatus pro se attollens, adversum Vitellianas partes modeste disseruit, inscitiam potius legionum quam audaciam increpans, nulla Vitellii mentione, sive ipsius ea moderatio, seu scriptor orationis sibi metuens contumeliis in Vitellium abstinuit, quando, ut in consiliis militiae Suetonio Paulino, et Mario Celso, ita in rebus urbanis Galerii Trachali ingenio Othonem uti credebatur.

What favourite grammatical construction of Tacitus is illustrated in (*c*) and (*d*)?

(*e*). Nullum in illa trepidatione Antonius constantis ducis aut fortissimi militis officium omisit. Occursare paventibus, retinere cedentes, ubi plurimus labor, unde aliqua spes, consilio manu voce insignis hoste, conspicuus suis. Eo postremo ardoris provectus est, ut vexillarium fugientem hasta transverberaret. Mox raptum vexillum in hostem vertit. Quo pudore haud plures quam centum equites restitere. Juvit locus, arctiore illic via, et fracto interfluentis rivi ponte, qui incerto alveo, et praecipitibus ripis fugam impediebat, ea necessitas seu fortuna, lapsas jam partes restituit. Firmati inter se densis ordinibus excipiunt Vitellianos temere effusos. Atque illi consternantur. Antonius instare perculsis, sternere obvios. Simul *caeteri*, ut cuique ingenium, spoliare, capere, arma equosque abripere. Et exciti prospero clamore, qui modo per agros fuga palabantur, *victoriae* se miscebant.

Quote the examples of the use of the *historical infinitive* in the above passsage.

Who are meant by *caeteri?* What is the construction of *victoriae?*

2. (*a*). Sed memoria mea ingenti virtute, divorsis moribus fuere viri duo, M. Cato et G. Cæsar. Quos quoniam res obtulerat, silentio praeterire non fuit consilium, quin utriusque naturam et mores, quantum ingenio possem, aperirem. Igitur eis genus, aetas, eloquentia prope aequalia fuere, magnitudo animi par, item gloria, sed alia alii. Cæsar beneficiis ac munificentia magnus habebatur, integritate vitae Cato. Ille mansuetudine et misericordia clarus factus, huic severitas dignitatem addiderat, Cæsar dando, sublevando, ignoscendo, Cato nihil largiundo gloriam adeptus est. In altero miseris perfugium erat, in altero malis pernicies: illius facilitas, hujus constantia laudabatur. Postremo Cæsar in animum induxerat laborare, vigilare: negotiis amicorum intentus sua negligere, nihil denegare quod dono dignum esset: sibi magnum imperium, exercitum, bellum novum exoptabat, ubi virtus enitescere posset. At Catoni studium modestiae decoris, sed maxime severitatis erat: non divitiis cum divite neque factione cum factioso, sed cum strenuo virtute, cum modesto pudore, cum innocente abstinentia certabat: esse quam videri bonus malebat: ita quominus petebat gloriam, eo magis illa sequebatur.

(*b*). Per idem tempus Uticae forte G. Mario per hostias deis supplicanti magna atque mirabilia portendi aruspex dixerat: proinde quae animo agitabat, fretus deis ageret, fortunam quam saepissime experiretur, cuncta prospere eventura. At illum jam antea consulatus ingens cupido exagitabat, ad quem capiundum praeter vetustatem familiae alia omnia abunde erant, industria, probitas, militiae magna scientia, animus belli ingens: domi modicus, lubidinis et divitiarum victor, tantummodo gloriae avidus. Sed is natus et omnem pueritiam Arpini altus, ubi primum aetas militiae patiens fuit, stipendiis faciundis, non Graeca facundia neque urbanis munditiis sese exercuit: ita inter artis bonas integrum ingenium brevi adolevit. Ergo ubi primum tribunatum militarem a populo petit, plerisque faciem ejus ignorantibus factis notus per omnis tribus declaratur. Deinde ab eo magistratu alium post alium sibi peperit, semperque in potestatibus eo modo agitabat, ut ampliore quam gerebat dignus haberetur. Tamen is ad *locorum* talis vir (nam postea ambitione praecops datus est) consulatum adpetere non audebat. Etiamtum alios magistratus plebes, consulatum nobilitas inter se per manus tradebat. Novus nemo tam clarus neque tam egregiis factis erat, quin is indignus illo honore, et quasi pollutus, haberetur.

Quote another instance of this use of *locorum* from Sallust's "Jugurtha."

illa quidem re, quae a te gesta est post hominum memoriam maxima, hortatorem desiderasti. Illud tamen breviter significandum videtur, populum Romanum omnia a te expectare atque in te aliquando reciperandae libertatis omnem spem ponere. Tu, si dies noctesque memineris, quod te facere certo scio, quantam rem gesseris, non obliviscere profecto, quantae tibi etiam nunc gerendae sint: si enim iste provinciam nactus erit, cui quidem ego semper amicus fui ante, quam illum intellexi non modo aperte, sed etiam libenter cum republica bellum gerere, spem reliquam nullam video salutis. Quamobrem te obsecro iisdem precibus, quibus senatus populusque Romanus, ut in perpetuum rempublicam dominatu regio liberes, ut principiis consentiant exitus. Tuum est hoc munus, tuae partes: a te hoc civitas vel omnes potius gentes non expectant solum, sed etiam postulant: quamquam, cum hortatione non egeas, ut supra scripsi, non utar ea pluribus verbis: faciam illud, quod meum est, ut tibi omnia mea officia, studia, curas, cogitationes pollicear, quae ad tuam laudem et gloriam pertinebunt. 1. Day dawned: the main army broke up from its camp, and began to enter the defile, while the natives, finding their position occupied by the enemy, at first looked on quietly and offered no disturbance to the march. But when they saw the long narrow line of the Carthaginian army winding along the sharp mountain side, and the cavalry and baggage cattle struggling at every step with the difficulties of the road, the temptation to plunder was too strong to be resisted; and from many points of the mountain above the road, they rushed down upon the Carthaginians. The confusion was terrible: for the road, or track, was so narrow that the least crowd or disorder pushed the heavily-loaded baggage cattle down the steep below: and the horses, wounded by the barbarians' missiles, and plunging about wildly in their pain and terror, increased the mischief.

2. Write an essay on *one* of the following subjects:—

(*a*). Quippe secundae res sapientium animos fatigant.

(*b*). Idem velle atque nolle ea demum firma amicitia est.

(*c*). Oratory can flourish only under a system of government in which the popular element is strong.

(*b*). Quote as accurately as you can, from memory, the peroration of the Second Philippic.

(*c*). Indicate briefly the differences between the declamation of Cicero and that of Demosthenes: and give Quintilian's estimate of his fellow countryman's eloquence.

(*d*). Livy's narrative presumes a knowledge of the antecedents of the Second Punic war. Summarize briefly the previous relations between Rome and Carthage.

(*e*). Did the division of his work into "decades" originate with Livy? What suggested such a division?

(*f*). What was Livy's idea of the great purpose of history?

(*g*). Livy's "Patavinity." Who reproached him with it? Note the *political* as well as the *literary* significance of the term.

(*h*). Enumerate the extant works of Tacitus. What period of time is covered by the four complete extant books of his Historiae?

(*i*). "In delineation of character Sallust's penetration is unmistakably shown." Justify this criticism by reproducing (in English) his sketch of *one* of the following: *Sulla*, *Jugurtha*, *Catiline*.

(*b*). Quote another passage from Kalidása, where 'the ether' is mentioned by a term similar to **श्रुतिविषयगुण** here.

(*c*). What is meant by **प्रकृति** in **सर्व्वभूतप्रकृति** ? Which system of Hindu Philosophy contributed most to the currency of this word, and how ?

(*d*). Give that name of 'wind' which has been paraphrased into **यया प्राणिनः प्राणवन्तः.**

(*e*). There is another reading in the fourth line, *i. e.*, **प्रसन्नः** in place of **प्रपन्न**, which do you prefer ? And why ?

Proceed and show that

(i.) If the system reduces to a single force, its line of action together with the given lines are generators of the same system on a hyperboloid of one sheet.

(ii.) If the system reduces to a wrench (that is, a force acting along a line and a couple whose axis coincides with this line), two right lines can be drawn meeting the three given lines and cutting the axis at right angles.

2. Obtain the equations of equilibrium of a string resting on any surface under the action of any forces.

Prove that the equations of equilibrium of a string resting on a smooth spherical surface of radius a, are

$$a\frac{d}{ds}\left(\sin^2\theta.\frac{d\phi}{ds}\,\mathrm{T}\right)+\mathrm{X}\sin\theta=0$$

$$a\frac{d}{ds}\left(\sin\theta.\frac{d\theta}{ds}.\,\mathrm{T}\right)+\mathrm{Y}\sin\theta=\frac{\mathrm{T}}{a}\cos\theta.$$

3. In the free equilibrium of a uniform string, in the plane of a uniform circular ring repelling it according to the law of the inverse cube of the distance, if the tension at any point be that to infinity under the action of the force, prove that the catenary will be a circle orthogonal to the circumference of the ring.

and at any internal point is

$$\frac{4\mathrm{M}}{\pi r}\int_0^{\frac{\pi}{2}}\left(1-\frac{r^2}{a^2}\sin^2\theta\right)^{\frac{1}{2}}d\theta.$$

Is there any discontinuity in the value of the potential?

Particle Kinetics.

1. A particle moves in a straight line under the action of attraction varying inversely as the n^{th} power of the distance of the particle from a fixed point in that line; determine the time of oscillation in each of the three cases where n is greater than, equal to, or less than unity.

2. Find the differential equation to the path of a particle subject to the action of a force to a given centre, and given the point from which it is projected and the velocity of projection, show how to determine the constants.

A particle describes a curve under an attractive force

$$P=\frac{\mu}{r^5}(r+2a)(r+4a):$$

it is projected when $r=2a$, at an angle of 30°, with a velocity which is to that in a circle at that distance as $\sqrt{2}:\sqrt{3}$. Show that the path is

$$r=a\left\{(\theta-\sqrt{3})^2-1\right\},$$

and the time to the pole is

$$\frac{4(3\sqrt{3}+2)}{15}\frac{a^2}{\sqrt{\mu}}.$$

3. Find the equations of motion of a string inside a smooth plane tube under any forces.

A rope is loosely coiled on the floor of a room and runs through a hole in the floor and coils itself up on the floor of the room below; if at the commencement of the motion, the lower end of the rope just touches the lower floor, and the portion of the rope thus hanging vertically be of length a, prove that the time occupied in transferring a length x to the lower floor is

$$2\sqrt{\frac{a}{g}}\log e^{\frac{x}{4a}}\left\{\sinh^{\frac{1}{2}}\frac{x}{2a}+\cosh^{\frac{1}{2}}\frac{x}{2a}\right\}.$$

4. Prove that for concurrent forces, every curve, plane or twisted, for which $s^2=\phi(r)$, where r is the vector from the centre of force, is tautochronous with respect to the origin of s, for the law of force

$$R=-\tfrac{1}{2}k^2\phi'(r),$$

k being any constant.

Hence show that every epicycloid is tautochronous, with respect to its vertex, for a force acting radially from the centre of its director circle, and varying directly as the distance from that point.

5. A particle P describes an ellipse under an attraction $=k^2\times$ distance from a point O. When P is at its greatest distance from O, O begins to move with a simple harmonic motion $=\mu\sin\lambda t$. Show that the motion of P may then be represented at any time by an ellipse whose centre is fixed, the minor axis being constant, and the semi-major axis varying with the time according to the law

$$a=a_0+\frac{\mu k}{\mu^2-k^2}\sec kt\left\{\lambda\sin\tfrac{1}{2}kt-k\sin\lambda t\right\}.$$

deduce the moments and products of inertia about all other axes or planes meeting in that point.

Find the moment of inertia of the elliptic disc

$$ax^2+2hxy+by^2+2gx+2fy+c=0$$

about a diameter parallel to the axis of y.

2. To say that a body is absolutely at rest, is meaningless; what, then, is the exact force of the words "fixed in space" when we say that a certain body is acted upon by certain forces and its motion is referred to axes "fixed in space"?

A uniform rod moves freely on a horizontal table, while a smooth ring slides on it; you are required, given all particulars, to determine the motion of the ring. What difference would it make if the rod revolved about a fixed point in itself?

3. Calculate the stress at any point of a rod in motion under the action of any forces.

A uniform rod is turning in a vertical plane round a horizontal pivot at one of its extremities; find the tendency to break at any point, and the point where it is most likely to break.

4. A plane lamina bounded by a curve, rolls on a fixed rough curve in the same plane under the action of given forces; show how to determine the motion by taking moments about the point of contact.

A heavy uniform circular disc of radius c rolls on the curve $s=f(\phi)$, starting from the highest point, from which s and ϕ are measured; prove that the equation of motion is

$$\left\{c+f'(\phi)\right\}\frac{d^2\phi}{dt^2}+f''(\phi)\left(\frac{d\phi}{dt}\right)^2=\frac{2g}{3}\sin\phi.$$

If the curve be $s=c\sin\phi$, the disc will fly off when $5\cos\phi=3$.

5. State the general principles of the Conservation of (1) Linear Momentum, (2) Angular Momentum, (3) Energy, carefully pointing out the limited aspect of the latter in theoretical dynamics.

A rod of uniform line-mass moving perpendicularly to itself on a smooth table impinges on a fixed smooth inelastic obstacle; show that its centre of inertia will immediately after impact proceed to describe the curve

$$\theta=\int\frac{d\phi}{\sqrt{1-e^2\sin^2\phi}},$$

where

$$\cos\phi=\frac{c}{r},\quad e^2=\frac{k^2}{k^2+c^2},$$

2. Obtain formulæ for the determination of the centre of pressure of any plane area, and show that if the area turns in its own plane about a fixed point, the locus of the centre of pressure is a conic.

Find the centre of pressure of a lamina in the form of a sector of a circle, immersed in fluid with its centre on the surface, and one of the bounding radii vertical.

3. Find the small angular oscillations of a heavy body floating in a liquid, disturbed from its position of stable equilibrium.

Discuss the case of an ellipsoid floating with its shortest axis vertical. If the density of the fluid be double that of the ellipsoid, find the condition that the periods of vertical and angular oscillation may be equal.

4. What are the fundamental facts on which the theory of surface tension is based? Show that at any point of a flexible surface an ellipse may be described in the tangent plane at that point, such that the tension across any radius is inversely proportional to that radius and in the direction of the conjugate radius.

Find the general differential equation to all possible forms of a liquid film subject to the same pressure on both sides. Give the geometric interpretation.

5. Establish Jacobi's Theorem that an ellipsoid with three unequal axes is a possible form of relative equilibrium for a mass of rotating fluid, the molecules of which attract each other according to the Newtonian law.

Prove that the pressure at any point on the surface varies inversely as the perpendicular from the centre on the tangent plane at that point.

Subject 11.

Hydrokinetics.

1. Establish completely the relation

$$\frac{\xi}{\rho} = \frac{\xi_0}{\rho_0}\frac{dx}{da} + \frac{\eta_0}{\rho_0}\frac{dx}{db} + \frac{\zeta_0}{\rho_0}\frac{dx}{dc},$$

and two other similar equations which constitute Cauchy's Integrals of the Hydrokinetic Equations.

Hence deduce immediately that the motion of a fluid, once irrotational, is always so.

2. Obtain the 'Equation of Continuity' in Cylindrical Coordinates.

A mass of fluid in which the pressure varies as the square of the density, is in motion, under no external forces, in a cylindrical tube; form the differential equation for the determination of the velocity, and thence show that when the motion is steady, the velocity at any point varies as the cube root of its distance from the point of zero-velocity.

3. Prove that when a sphere is moving through an infinite expanse of uniform frictionless fluid, which was initially at rest, the velocity of the liquid at any point is given by the space-variation of the function

$$\phi = \frac{-c^3 V \cos\theta}{2r^2}$$

and determine the stream lines.

Prove also that when the sphere is made (by magnetic or other action from a distance) to move in a straight line with velocity V and acceleration f, the liquid will be driven off from the sphere in front and rear, so as to create a vacuum, if

$$V^2 + af > \frac{2p}{\rho}.$$

4. Explain what you understand by vortex motion, and establish carefully Dr. Helmholtz's fundamental theorems:

(i.) Every vortex is always composed of the same elements of fluid.

(ii.) The product of the angular velocity of any vortex into its cross-section is constant with respect to the time, and is the same throughout its length.

(iii.) Every vortex must either form a closed curve or have its extremities in the boundary of the fluid.

Hence show that the circulation in any circuit is twice the sum of the strengths of all the vortices which it embraces.

5. A wind of velocity V is blowing horizontally over the surface of deep water; if σ be the specific gravity of air, prove that the velocity of propagation of waves of length λ travelling with the wind is

$$\frac{\sigma V}{1+\sigma} + \left\{ \frac{g\lambda}{2\pi} \cdot \frac{1-\sigma}{1+\sigma} - \frac{\sigma V^2}{(1+\sigma)^2} \right\}^{\frac{1}{2}}$$

Group III.

Subject 12.

Geometrical Optics.

1. Find the aberration of a pencil directly refracted at a spherical surface, and if the rays be parallel, find the radius of the least circle of aberration.

If the pencil of rays diverge from a point whose distance from the centre of the refracting surface is μ times the radius, the refracted rays will all pass accurately through another point, whatever be their incidence.

2. Prove that the caustic by refraction at a circle for rays issuing from a point is the evolute of a Cartesian Oval, and consider the particular cases when (1) the centre of the circle (2) the radiant point, is at an infinite distance.

Hence show that the caustic by refraction for parallel rays of a circle of radius c and index of refraction μ, is the same curve as the caustic by refraction for parallel rays, of the concentric circle, radius $\frac{c}{\mu}$, and index of refraction $\frac{1}{\mu}$.

3. Explain the method adopted in refracting telescopes for destroying the aberration due to colour.

Describe how far and by what means the same can be effected in an eye-piece through which the pencil passes excentrically.

Contrast the two problems.

4. A pencil of light proceeding from a point Q is reflected by a surface formed by the revolution of the curve

$$\log r = f(\theta)$$

about an axis through Q; if rays making an angle θ with the axis, cut the axis, after reflexion, in q, prove that

$$Qq \begin{vmatrix} 2\cos\theta & 1 & f'(\theta) \\ \sin\theta & f'(\theta) & 0 \\ 0 & f'(\theta) & 1 \end{vmatrix} = 2e^{f(\theta)} f'(\theta).$$

Hence prove that if the axis be normal to the surface, the ultimate position of q for direct rays, is given by

$$Qq = \frac{2f''(\theta)}{2f''(\theta) - 1} \; e^{f(\theta)}.$$

Verify this result for a concave spherical surface.

5. Prove that any system of rays originally normal to a surface, will always retain the property of being normal to a surface after any number of reflexions or refractions.

Hence show that the effect of any number of reflections and refractions on the form of a pencil can be produced by a single refraction at some surface into a medium with an arbitrarily chosen index, or by a single reflexion.

$$\text{show that } L = \frac{373^2 \times 10333 \times 27{\cdot}25}{760 \times 273 \times 425 \times {\cdot}640 \times 1{\cdot}293}.$$

11. When steam is produced from boiling water at 100, how much of the heat supplied goes to perform external work and how much to separate the molecules from each other?

12. Maxwell calls the second law of thermo-dynamics a statistical truth, what does he mean? A recent writer says, "This is what Maxwell's Demon is pleasantly imagined to do: he separates those particles which he prevents from going in one direction from

those which he allows to go in another, so that ere long, without expending any work, he has the particles divided into two groups moving in opposite directions." And again, "The molecular motion which is implied in a state of uniformly diffused heat may be so arranged and directed as once more to produce a state of things such that particles may become aggregated into masses, in which all the particles may move on the whole in the same direction." Is this a true account of the office of the demon ?

(*a.*) Instead of this question if you like you can substitute: Calculate the average velocity of the molecules of hydrogen at 0°C, and establish the formula you employ.

11. Give a sketch of the electro-magnetic theory of light, and of the evidence in its favour.

12. Prove that the mutual energy of two circuits s and s_1 in which currents i and i_1 are flowing is $ii_1\int\int\frac{\cos\epsilon}{r}\,ds\,ds_1$.

OPTICS.

1. In any optical instrument formed of lenses and mirrors on the same axis, prove that the magnifying power is equal to the ratio of the breadth of an incident pencil at the object-glass to the breadth of the same pencil at the eye-glass.

If m be the magnifying power of such an instrument when adjusted for an eye which sees clearly with the incident light parallel, and if the eye-glass (focal length l) be moved till the instrument is in adjustment for an eye whose distance of distinct vision is d. Shew that the magnification is increased by $\frac{mf}{d}$.

2. Explain fully the formation of the secondary rainbow, and account for the order of the colours.

3. What is meant by the foci, principal points and nodal points of a system of lenses. Describe how they may be determined experimentally.

4. State the principal facts relating to fluorescence, and give a brief account of the experiments by which they have been established.

5. Light diverging from a point A is refracted through a small isosceles prism BCD, the angle BCD of which is very nearly two right angles and falls perpendicularly on a screen which is parallel

to the plane BD. Explain the formation of coloured bands on the screen.

Prove that the breadth of the bands for different colours is not proportional to their wave lengths. Hence explain the difference between the phenomena in this case, and in that of Fresnel's experiment with two mirrors.

6. Find the difference of retardation of the ordinary and extraordinary rays in passing nearly perpendicularly through a plate of uniaxal crystal cut perpendicular to the axis.

If the plate be placed between two tourmalines, and a small conical pencil of light be incident with its axis parallel to the axis of the crystal, calculate the intensity of light in the field of view and describe the appearance presented.

7. Describe an arrangement for determining accurately the plane of polarization of a polarized ray.

Give an account of Kerr's experiments showing the effects of magnetic stress in a transparent medium on a ray of polarized light traversing it.

8. Shew how the rotation of a plane polarized ray in a medium like turpentine can be explained by assuming that circularly polarized rays of opposite kinds are propagated with slightly different velocities.

Describe Soleil's saccharimeter.

9. Light passes from a luminous point through a small circular aperture and falls upon a distant screen. Calculate the position of the interference bands.

10. Describe fully the following optical instruments (1) Wollaston's Prism, (2) Nichol's Prism, (3) Fresnel's Rhomb, explaining the principles on which their construction and use are based.

11. What is meant by the wave surface? Discuss its form in the case of biaxial crystals.

Explain the phenomenon known as external conical refraction.

12. Give an account of the methods by which interference bands can be obtained by the use of thick transparent plates.

Give the theory in the case of the spherical concave mirror as employed by Newton.
